

# ORION Fans CROSS REFERENCE

## ABOUT THIS CROSS REFERENCE

The following cross reference material is for general information only. It covers the basic fan models for **Comair-Rotron, Sunon, ADDA, ETRI, NMB, Nidec, Delta** and **EBM/Papst**. In each case the crossed material is provided in a way that will allow you to find the appropriate ORION FAN equivalent in terms of size and voltage. Specifics such as CFM (airflow), static pressure curves, power draw and dB (noise) vary greatly among manufacturers and crosses are rarely exact. Therefore some thought must be given to choosing a replacement fan.

### Instructions:

1. Find the closest part number match on the table below to the part that you are crossing and make a note of the ORION recommend replacement.
2. Go to the quick size reference on the index page and find the ORION Series number.
3. Verify that the size (outside dimensions) and voltage (AC vs. DC) are the same as the fan that you are trying to cross
4. Turn to the appropriate page and compare specifications.
5. If the ORION specifications are not within your tolerances then choose the model that most closely fits your requirements in terms of noise vs. CFM etc.

If you cannot find a suitable replacement for your fan in this catalog then please give us a call. We have several new fan models that are currently under development and many of our existing fans are available with alternate case configurations.
